

# <ECode/>

## **GreeNet**

Chat with GreeNet to learn about  
going green.

**START**

## **CarbonData**

Check your website's carbon  
footprint.

**START**

```

        </Link>
      </div>
    </div>
  );
};

export default function LandingPage() {
  return (
    <div className="LandingPage-row">
      <img src={ECOdelImage} alt="ECOde Logo" className="ecode-logo"/>
      <LandingPageCard
        imageSrc={GreeNetImage}
        heading="GreeNet"
        description="Chat with GreeNet to learn about going green."
        path="/chatbot"
      />
      <LandingPageCard
        imageSrc={CarbonDataImage}
        heading="CarbonData"
        description="Check your website's carbon footprint."
        path="/search"
      />
    </div>
  );
}

```

modify the code to make it greener

web development by making the website faster, more efficient, and better optimized for resource usage. Let me know if you have any other code snippets or questions!

modify the code itself

Certainly! Here are some modifications to make the code itself greener:

```
```javascript
import React from 'react';
import { Link } from 'react-router-dom';
import { Button } from '@mui/material';
import GreeNetImage from '../assets/GreeNet.png';
import CarbonDataImage from '../assets/CarbonData.png';
import ECOdeImage from '../assets/ECOde.png';

const LandingPageCard = ({ imageSrc, altText, heading, description, path }) => {
  return (
    

### {heading}

{description}

```
